LAX CHEE

Web Designer & Front-End Engineer

About

Originally from Singapore, I have spent the past six years immersed in the rich culture of Japan, where my passion for digital design flourished. With experience working alongside renowned agencies like J. Walter Thompson, Fixx Digital and Cornea Design, I have developed a masterful ability to create visually captivating and user-friendly digital products.

My expertise extends beyond mere design into the realm of web development, ensuring a seamless transition from concept to realisation. This dual proficiency enables me to adopt a comprehensive approach to projects, prioritising functionality without compromising on aesthetics. With each project, I push the boundaries of digital design, delivering innovative and impactful solutions.
